

EXHIBIT C

Name	ID	Product	Date of implantation	Date of removal	Time since implanted (approx.)	Reason for removal	Materials received for review	Description	Inflammation	Connective tissue response	Quality of mesh	Special stains show	Photos taken?
Barker, Daphne		TVT	4/28/2009	Scheduled 2/12/2016	6 years, 10 months	Erosion, pelvic pain, dyspareunia, urinary dysfunction	TBD						
Barton, Kathy		TVT-O	12/31/2008	4/26/2011	2 years, 4 months	Erosion and pelvic pain	1-4 H&E, 5-6 S100, 7-8 Trichrome, 9- Trichrome control	Mesh fibers in dense fibrosis/scar	Mild chronic, foreign body reaction to fibers as well	Scarring forming around mesh fibers	Some intact fibers in tissue, possible focal "treebarking"	S100: Small nerves in scar tissue and adjacent to mesh fibers. Trichrome: Blue fibrosis	Yes
Bridges, Barbara		Prolift Total; TVT-O	7/22/2006; 9/15/2006	12/6/2013	7 years; 4 months	Erosion at the apex, pelvic pain, dyspareunia, incomplete emptying, chronic constipation, recurrent UTIs, urgency, nocturia, and hematuria	4 H&E, 1 S100, 1 trichrome, 1 trichrome control	Multiple pieces of tissue, one with fibrosis and clusters of mesh and inflammation, two with squamous mucosa, one of which has submucosal inflammation and mesh fibers with giant cells	Mild-moderate in mucosal piece	Dense fibrosis	Treebarking present	S100: Not contributory, Trichrome: Dense fibrosis around mesh	Yes
Doyle, Carolyn		Prolift Total	12/19/2007	2/1/2012	4 years, 1 month	Erosion in posterior; urinary retention	4 H&E, 1 S100, 1 trichrome, 1 trichrome control	One piece covered with squamous mucosa with multiple clusters of mesh fibers with surrounding chronic inflammation - dense in areas. Ulceration/defect in mucosa overlying areas of dense inflammation (focally active) with mesh. Other piece with only fibrosis and mesh fiber clusters with entrapped nerves.	Mild to moderate chronic inflammation and giant cell response centered around mesh fibers. Ulcerated areas with neutrophils and plasma cells as well.	Dense fibrosis around and between fibers	Treebarking present	S100: Multiple small-mid sized nerves in dense fibrosis around mesh (+entrapment), Trichrome: Fibrosis in and around mesh fibers	Yes
Fuller, Ann		Gynemesh	10/10/2007	12/17/2013	4 years, 10 months	Erosion, chronic pelvic pain, urinary urgency, overactive bladder, dyspareunia, levator spasm and mixed stress and urge urinary incontinence.	3 H&E, 1 S100	Two pieces of fibrous tissue with multiple clusters of mesh with surrounding giant cells, chronic inflammation and fibrosis. Treebarking and residual fiber.	Mild chronic and foreign body giant cell reaction around fibers	Dense fibrosis around and between fibers	Treebarking present. A residual fiber also has the degenerating layer around it.	S100: Rare small nerve	Yes
Gonzales, Amelia		Prolift+ M & TVT Secure	1/20/2010; 4/8/2010	4/8/2010	3 months	granulation tissue	4 H&E, 1S100, 1 Trichrome	< 1 mm single piece of granulation tissue with neutrophils	Active and chronic	All granulation tissue	No mesh present in sample	non-contributory	Yes
"	S11-16732	Prolift+ M & TVT Secure	1/20/2010; 4/8/2010	12/13/2010	8 months	recurrent UTIs, mesh extrusion in bladder	2 H&E, 2S100, 2 CD15	Fragments of scarred fibrotic tissue with focal dense chronic inflammation. One piece has cauterized edge with dethatched mesh fiber.	Focal moderate chronic	Dense fibrosis/scar	Single dethatched mesh fiber present	S100: Small nerve fibers present, CD15 non-contributory	Yes
Joplin, Deborah	Two blocks only 11ES-12887 and 11-ES-6081	TVT-O	9/18/2006	12/19/2011	5 years, 3 months	suprapubic pain, fistula, extrusion							
Holland, Amy	Suncoast	Prolift Anterior & TVT-O	11/4/2008	2/3/2009	3 months	erosion, dyspareunia	2 H&E, 1 S100	Multiple fragments of tissue. Granulation tissue with active inflammation c/w mucosal ulcer. Larger pieces of fibrotic tissue with dense inflammation and mesh fibers.	Active in areas of granulation tissue. Chronic around mesh fibers in fibrosis. Foreign body giant cell response also present.	Dense fibrosis/scar	Treebarking present	S100: No nerves in sample	Yes
"	S09-34723	Prolift Anterior & TVT-O	11/4/2008	9/18/2009	10 months	dyspareunia, pelvic pain	4 H&E; 9-10 S100, 11-12 Trichrome, 13 Trichrome control	Single piece of tissue with dense fibrosis on trichrome, multiple small nerves on S100, focal mesh fibers at one edge in tissue	Minimal chronic inflammation. Focal giant cell response.	Dense fibrosis/scar	Not definite (only 2 fibers present); mesh fiber intact	S100: Multiple small nerves in dense fibrosis, Trichrome: Blue fibrosis	Yes
Kilday, Mary	GS10-7251	Prolift+M Posterior	9/9/2009	6/16/2010	9 months	dyspareunia	3 H&E, 1 S100	3 pieces of tissue with scar plate surrounding mesh fiber clusters	Mild chronic and foreign body giant cell reaction around fibers	Dense scar plate around mesh fibers and entrapping nerves	Treebarking present	S100: highlights nerves entrapped in scar adjacent to and embedded in mesh	Yes
Lager, Kimberly	OP11-4760	Gynemesh PS (TVT-O implanted on 7/12/2007 was not revised)	5/17/2010	8/11/2011	1 year, 3 months	erosion	3 H&E, 1 S100, 1CD15, 1 Trichrome, 2 controls	Multiple pieces of tissue with clusters of mesh fibers and surrounding chronic and foreign body inflammation. Squamous mucosa present.	Mild-moderate chronic inflammation and giant cell reaction around mesh fiber clusters	Dense scar/fibrosis around mesh fibers	Treebarking present	S100 highlight small nerves, Trichrome highlights fibrosis, CD15 non-contributory	Yes
Phelps, Patti	S15-19326 (original 09-S-2400)	TVT	7/12/2000	2/11/2009	8 years, 6 months	erosion, pelvic pain and pressure, bladder pain and pressure, dyspareunia	2 original H&E slides from blocks 1A and 2A plus H&E recut of each with S100, ASMACC20 and unstained on each	Mucosal and submucosal tissue with abundant mesh fibers, fibrosis, mild chronic inflammation and entrapped nerves. Also A2 contains fibrosis around skeletal muscle fibers that are atrophic/damaged.	Mild chronic with foreign body reaction	Dense fibrosis around fibers	Treebarking present	S100 = multiple nerves in dense fibrosis around mesh fibers	Yes
Quijano, Maria	S-12-1719	TVT	3/29/2010	1/23/2012	1 year, 10 months	erosion, dyspareunia	B1-B7 - 1 H&E, 3 unstained each block. C1- 1 H&E, 3 unstained	Cervical tissue -- looks like squamo-columnar junction of cervix with dysplasia. No mesh.					

Name	ID	Product	Date of implantation	Date of removal	Time since implanted (approx.)	Reason for removal	Materials received for review	Description	Inflammation	Connective tissue response	Quality of mesh	Special stains show	Photos taken?
Schachtman, Rhoda		Prolift Total (TVT also placed on 2/7/2008)	2/7/2008	2/14/2012	4 years	erosion, urinary dysfunction, pelvic pain	1-4 H&E, 5-6 S100, 7-8 Trichrome, 9- Trichrome control	Two pieces of scarred fibrous tissue with multiple clusters of mesh fibers with giant cell reaction and chronic inflammation	Present, mild chronic, foreign body reaction	Dense fibrosis	Treebarking present	S100: Multiple small to mid-sized nerves entrapped in fibrosis and in between mesh fiber clusters, Trichrome: Dense fibrosis in between and around fibers and entrapping nerves	Yes
Thomas, Deanna	F10-3434	Gynemesh & TVT	12/10/2009	10/25/2010	11 months	bunching of anterior mesh, pelvic pain	2 H&E, 1 S100, 2 Trichrome, 1 CD15	Two pieces of tissue with dense fibrosis/scar surrounding clusters of mesh fibers	Mild chronic and foreign body giant cell reaction around fibers	Dense fibrosis/scar around mesh fibers	Treebarking present	S100: Nerves adjacent to mesh in scar tissue, Trichrome: highlight scar	Yes
Thompson, Lisa	S10-1271	TVT-O	2/20/2009	6/25/2010	1 year, 4 months	dyspareunia, urinary retention, mixed incontinence	A1 - 2 H&E, 6 unstained A2- 2 H&E, 6 unstained	Squamous mucosa, large pieces with deep submucosal fibrosis. No mesh fibers present.	Minimal	Dense fibrosis at deep aspect of excision	None present in slides	None	Yes
Van Rensburg, Jennifer	S14-1546	Prolift & TVT Secur	2/5/2008	5/7/2014	6 years, 3 months	erosion, pelvic pain secondary to vaginal scarring, urinary dysfunction including OAB and incomplete emptying	3 H&E, 1 Trichrome, 2 CD15	One piece of tissue with dense scar around clusters of mesh fibers	Mild chronic and foreign body giant cell reaction around fibers	Dense fibrosis/scar around mesh fibers	Treebarking present	Trichrome dense scar around mesh fibers	Yes
Wise, Mary	FX12-1330	Prolift+M Total; TVT	12/17/2009	1/19/2012	2 years, 1 month	post-menopausal bleeding, banding at the apex of the vagina, dyspareunia	Parts A, B and C each have 3 H&E, 2 S100, 1 trichrome, plus 1 trichrome control	A- ECC tissue only, B- minute fibrous tissue (NSA), C- Squamous mucosa with normal submucosa	None	None	None	Trichrome shows normal submucosa	Yes (trichrome in C)
"	S145-1045	Prolift+M Total; TVT	12/17/2009	10/20/2015	5 years, 10 months	erosion, pelvic pain, contracture and banding of mesh	5 H&E, 2 S100 and 2 Trichrome stains for each of 2 blocks (A1 and A2)	Mesh fibers in dense scar with chronic inflammation and giant cell reaction. Present out in adipose tissue as well. Nerve entrapment. One piece has lymph node adjacent.	Mild-moderate chronic inflammation and giant cell reaction around mesh fiber clusters	Scar/fibrosis, abundant	Treebarking present	S100: multiple nerves, some entrapped next to mesh, Trichrome: scar/fibrosis	Yes
